Upcoming Week

Navy/Northrop Grumman, Bethpage, NY: Northrop-Grumman (NG) has scheduled a virtual public meeting with the local community for February 4, 2021. The purpose of the meeting is to share the results of the feasibility study for the RW-21 piping route. This routing is planned for the interceptor sewer to convey contaminated groundwater from the RW-21 off-site hotspot to the new treatment plant proposed for location on the NG property. NG's local permit request to access Town streets is scheduled to go before the Town of Oyster Bay for consideration on February 9. NG has noted that public input before that meeting is important to its project success.
